

Practice	Introduced or native	Minimum Cover Requirements
CP1 -permanent introduced grasses and legumes	introduced grass	2-3 species of introduced grass (10 point)
	introduced grass and forb	3 grasses and 1 forb (4 total species - 40point)
CP2 -permanent native grasses and legumes	native grass	2 grasses and 1 forb (3 species - 20 points)
	native grass and forbs	Minimum of 3 native grasses and 1 forb (5 total species - 50 points)
CP3A -hardwood tree planting	native	Consult DNR forester for tree planting plan
CP4D - permanent wildlife habitat	introduced or native	4 total species of either grasses, trees, shrubs, forbs or legumes; minimum of 2 cover types (40 points)
	native	5 total species of either grasses, trees, shrubs, forbs, or legumes; minimum of 2 cover types (50 points)
CP8A - grass waterway	introduced or native grasses and forbs	Must meet critical area planting standard - can be 25 lbs/ac brome at a minimum
CP15A - contour grass buffer strip	introduced or native grasses/forbs/legumes	Must meet conservation cover standard - can be 10 lbs/ac brome at a minimum
CP21 - filter strip	introduced or native grasses/forbs/legumes	Must meet conservation cover standard - can be 10 lbs/ac brome at a minimum
CP25 - rare and declining habitat restoration	native	5 native grasses and 10 native forbs; may include shrubs not to exceed 5% of the offer
CP31 - bottomland timber establishment	native	Consult DNR forester for tree planting plan
CP33 - habitat buffers for upland birds	native	At least 4 grasses and 5 forbs/legumes; can also include shrub plantings not to exceed 10% of the contracted acres; do MCM twice during the contract
CP42 - pollinator	native	Minimum of 10 species including at least 3 flowering species from each of the 3 bloom periods (spring, summer, fall). Should also include 1 legume and 1 bunchgrass or clump-forming sedge. Grass cannot exceed 50% of the mix.
planted firebreak	introduced	Grass or grass/legume mix with a minimum of 25% grass; avoid tall fescue, brome, birdsfoot trefoil and sweet clover. Consider timothy, perennial rye, red clover, orchard grass, alsike clover, alfalfa, and red top. Must meet conservation cover standard.
